## DETAILED ACTION

### *Allowable Subject Matter*

1. **Claims 1-21** are allowed.
2. The following is an examiner's statement of reasons for allowance: Yemini et al. teach all of the features of the claimed invention, except a method of determining a mismatch measure between each of the plurality of groups of possible observable events in the mapping and the one or more known observable events using a computer, while disregarding observable events in the groups of possible observable events not determined to be known; and selecting one or more of the plurality of likely events corresponding to one of the plurality of groups having the smallest mismatch measure.

The prior art of record also does not teach providing a computer-accessible codebook comprising a matrix of values each corresponding to a mapping between one of a plurality of the possible known and unknown symptoms and one of a plurality of likely events in the system; and decreasing the loss probability for symptoms in the codebook that have been received; determining a mismatch measure between each of a plurality of groups of the values in the codebook and the plurality of known symptom data values through the use of a computer, the mismatch measure taking into account the loss probability of symptoms; and selecting one of the plurality of likely events corresponding to one of the plurality of groups having the smallest mismatch measure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
